

Product Managers/ Cloud Engineers (Remote)

With many Product Managers / Cloud Engineers finding that remote work allows them to be more productive - those that are going in 1 or 2 days a week, are usually happy to consider roles that are based further afield.

This has allowed companies to fill roles that were vacant for some time, usually at lower-than-expected salaries.

Not only can you find rare skills that don't exist in your local area, it can give you a huge competitive advantage over those with a traditional "on-prem" approach to hiring.
