

Junior Developers & Graduates

With university now over for this year's IT & Technology Graduates and master's programs coming to close also, Shift F5 are working hard to match our clients with this years Graduates & Postgraduate tech talent who are now available to start their career.

Adding a Graduate to your team can bring some incredible benefits:

- Fresh perspectives - research shows that many great innovators do their best and most ground-breaking work in their youth
- Cost effective growth - many graduates have modest salary expectations and value training and development over money
- Graduates have specialist technical skills that may not be available locally
- A wave of enthusiasm, which can boost the working environment, improve morale
- Graduates are extremely adaptable & learn quickly which can lead to financial returns and better levels of productivity.

Would you like to see some specific examples? I've attached a list of our favourites.

Get in touch on 0161 388 2635 or Jake.Livermore@ShiftF5.co.uk For more details

Shift F5 also work with graduates across the following disciplines

- Networking, Infrastructure & Cyber Security
- Software Development & Engineering
- IT & Software Support
- Marketing, Project Management & Commercial
